Graduate Program in Food Science

Briefing Session for Enrollment Application

Climate change, infectious diseases, and a growing global population threaten food security. By 2050, hunger may affect 2 billion people, highlighting the urgent need for sustainable food production and global cooperation.

The International Joint Graduate Program in Food Science (GP-Food), established in October 2024, provides an international platform for education and research to address global food challenges. GP-Food nurtures experts in food science with a global perspective.

Join us for an information session about the GP-Food Program for the October 2025 cohort. We look forward to your participation!

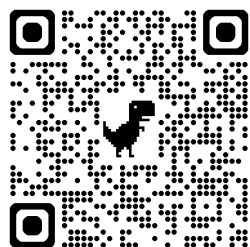

◆ Briefing session for enrollment application

Date and Time : **July 8, 2025 (Tue) 16:20 ~**

Place : Lecture Room1, Aobayama Commons

Available online as well
